

Prototype production

BBC Cellpack Technology

YOUR **PROTOTYPES** ARE IN BEST HANDS

Our company is your reliable partner for the production of high-quality prototype parts through machining. With a dedicated team of highly motivated employees, we guarantee efficient and precise results that meet your requirements. You can rely on our top performance to successfully implement your projects and achieve your goals.

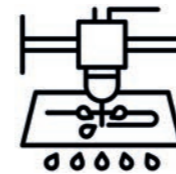

Consulting

Take advantage of our many years of expertise and creative solutions to master your challenges efficiently and innovatively.

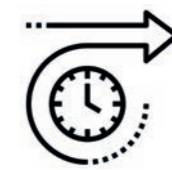

Dedicated CNC machines

Flexible, fast and precise processing with the best machines for the individual requirements of our customers.

Quick prototypes

3D printing makes it possible to produce complex geometries quickly, while our waterjet cutting system cuts a wide variety of materials efficiently.

Forward thinking

After delivery of the prototypes, we use the knowledge gained to develop the optimum production solution for series production.

YOUR PROTOTYPE JOURNEY

1

Our manufacturing experts will advise you.

2

We deliver the offer within 24 hours.

3

You can track the production status live.

You will receive your prototypes in 1-2 weeks.

4

We support you in finding out how you can save time and costs for the series.
